

Overcoming your logistics challenges

Complex planning and execution for oversized and unique cargo. As project logistics professionals, we don't overcome obstacles; we anticipate them.

Let's talk!  projectlogistics@oiaglobal.com

Ro-Ro & Breakbulk shipping | River Barging | Charters | Port Handling | Risk Assessments | Route Surveys

Project Logistics

OIA Global's project logistics team works to overcome bridges, narrow roads, and countless other obstacles to transport unique and oversized cargo. Project logistics teammates regularly complete both in gauge cargo handling, like road freight, and out-of-gauge cargo handling, such as breakbulk ocean chartering.

Success in project logistics truly depends on excellent planning and careful execution. Teammates develop route plans, method statements, and risk assessments so that all potential scenarios are considered, and plans can remain adaptable. We will ensure the safety of all personnel, cargo, and equipment involved in your shipment.

- ✓ Heavy lift, abnormal, & out-of-gauge (OOG) cargo
- ✓ Coordination & sequencing of multiple contractors & port operations
- ✓ Real-time shipment visibility
- ✓ Ocean & air chartering
- ✓ Qualified, trained personnel at remote locations
- ✓ Adaptability during plan execution
- ✓ On-time transport clearances
- ✓ Contract logistics services (warehousing & distribution)
